

1st Digital Rheumatology Day

Lausanne, February 1st 2019
The Olympic Museum

This is a State-of-Art conference in order to discuss current evolution and the future of digital solutions including possibilities and threats in rheumatology.

The program will include plenary sessions, poster presentations and interdisciplinary round tables on the following topics:

- Needs and expectations of patients and doctors
- Digital biomarker
- Apps and digital therapeutics
- Digital patient reported outcome
- Deep learning and artificial intelligence
- Augmented reality medicine
- E-learning and education
- E-diagnosis
- Ethical aspects
